***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: The prior art does not teach a lubricating arrangement for a continuously variable transmission (CVT) as described by the claims. As shown by the cited references, it was known to provide a pivoting nozzle for lubricating the disc and/or the roller of CVT, but the prior art does not teach the nozzle being configured to only spray oil onto the discs, at positions circumferentially spaced from positions at which the inner surfaces contact with the peripheral surfaces of the rollers. With respect to claim 4, the prior art fails to teach a pivoting nozzle configured to spray oil only to portions of the inner surfaces of the input and output discs circumferentially spaced from the contact areas. Accordingly, claims 3 and 4 define over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
